Report of the Meeting of Experts on the finalization of the Classification of benthic marine habitat types for the Mediterranean region and the Reference List of Marine and Coastal Habitat Types in the Mediterranean
(Rome, Italy, 22-23 January 2019)

Introduction

1. In accordance with the Decision of the twentieth Ordinary Meeting (Tirana, Albania, 17-20 December 2017), of the Contracting Parties to the Barcelona Convention for the Protection of the Marine Environment and the Coastal Region of the Mediterranean and its Protocols, the Specially Protected Areas Regional Activity Centre (SPA/RAC) was requested to finalize, in consultation with its focal points, the Classification of benthic marine habitat types for the Mediterranean region and the Reference List of Marine and Coastal Habitat Types in the Mediterranean, with a view to submitting them to the Contracting Parties at their Twenty-first Ordinary Meeting (Decision IG.23/8).

2. The Meeting of Experts on the finalization of the Classification of benthic marine habitat types for the Mediterranean region and the Reference List of Marine and Coastal Habitat Types in the Mediterranean was held in Rome, Italy from 22 to 23 January 2019 in the premises of the Italian National Institute for Environmental Protection and Research, ISPRA (Via Brancati, 48 - 00144 Rome, Italy).

Participation

3. All the focal points for SPAs had been invited to attend the meeting or to designate their representatives. The following Contracting Parties were represented at the meeting: Albania, Algeria, Bosnia & Herzegovina, Egypt, France, Israel, Italy, Lebanon, Libya, Malta, Morocco, Montenegro, Slovenia, Spain and Turkey.

4. The following institutions and organisations were represented by observers: European Topic Centre for Biological Diversity (ETC/DB) and OCEANA.

5. SPA/RAC acted as the Secretariat for the meeting.

6. The list of participants is attached as Annex I to the present report.

Agenda item 1 Opening of the meeting

7. The meeting was opened on Tuesday, 22 January 2019, at 9 a.m., by the representatives of the host country, the Coordinating Unit of the UN Environment/Mediterranean Action Plan (UNEP/MAP) and SPA/RAC.

8. Mr Alessandro Bratti, General Director of ISPRA, welcomed the participants. He explained the role that ISPRA is playing in relation to the MSFD but also as regards the EUNIS classification. ISPRA is one of the specialized institutions of the multidisciplinary expert consortium of the European Topic Centre on Biological Diversity in charge of the marine section of EUNIS.

9. Mrs Tatjana Hema, Deputy Coordinator of UNEP/MAP, recalled some of the achievements of the MAP system of the Barcelona Convention, such as the Mediterranean Strategy for Sustainable Development, the Ecosystem Approach with the aim to create "A healthy Mediterranean with marine and coastal ecosystems that are productive and biologically diverse for the benefit of present and future generations", and thus a "Good Environmental Status in the Mediterranean Sea and Coast", the Integrated Monitoring and Assessment Programme (IMAP). She commended the support of Italy for hosting this important Expert Meeting and facilitating its organization. The deputy Coordinator acknowledged that the updating of the classification and reference list of marine habitat types is an important step towards supporting the implementation of the IMAP and the Ecosystem Approach as whole.

10. After welcoming the participants, Mrs Maria Carmela Giarratano, General Director of Nature Protection, Italian Ministry of the Environment, Land and Sea, underlined the importance of the meeting as Italy has 29 MPA from which 10 are included in the SPAMI list. She reminded also that Italy will hold the 21th Barcelona CoP meeting in Naples in 2019. She informed the participant that Italy is supporting a Mediterranean project with UNEP/MAP and SPA/RAC for twining between SPAMIs to exchange experience and best practices like the standardised management of the Italian MPA (ISEA). The kick-off meeting of this project will be held in April 2019 in the Torre del Cerrano Italian MPA concerned by this project.

11. Mr Khalil Attia, Director of SPA/RAC, welcomed the participants and thanked the Italian authorities and ISPRA for hosting the meeting and expressed its gratefulness to the MAVA Foundation for Nature, for contributing financially in the organisation of this Meeting, through Med Key Habitats Project. He reminded the context of the meeting, the decision IG 23/8, where the Contracting Parties requested UNEP-MAP-SPA/RAC to finalize, in consultation with focal points, the classification of benthic marine habitat types for the Mediterranean region and the Reference List of Marine and Coastal Habitat Types in the Mediterranean, with a view to submitting them to the Contracting Parties at their twenty-first meeting. He emphasized that the documents of the meeting were elaborated ~~in~~ in a participatory process and that during the meeting will discuss, review~~,~~ and endorse the classification of benthic marine habitat types and the Reference List of Marine Habitat Types already pre-finalized through the online work and email exchange.

Agenda item 2 Rules of procedure

12. The internal rules adopted for meetings and conferences of the Contracting Parties to the Convention for the Protection of the Marine Environment and Coastal Region of the Mediterranean and its Protocols (UNEP/IG.43/6, Appendix XI) were applied mutatis mutandis to this meeting.

Agenda item 3 Adoption of the agenda and election of officers

13. The Secretariat introduced the provisional agenda, which had been distributed as document UNEP/MED WG.457/1, and the annotated version in document UNEP/MED WG.457/2

14. After reviewing the two documents, the meeting approved the Agenda and the proposed timetable. The Agenda of the meeting appears as Annex 2 to this report.

15. The Secretariat proposed that the meeting be held in daily sessions from 9:00 to 13:00 and from 14:30 to 18:00, subject to adjustments as necessary.

16. The working languages of the meeting were English and French. Simultaneous interpretation was available for all the plenary sessions.

17. The meeting unanimously elected the following officers:

Chairperson:	Mr Leonardo TUNESI (Italy)
Vice-Chairpersons:	Mr Moustapha FOUDA (Egypt)
	Mr Samir BEQIRAJ (Albania)
Rapporteur:	Mr Hocein BAZAIRI (Morocco)

Agenda item 4 Draft Updated Classification of benthic marine habitat types for the Mediterranean region

18. The Secretariat introduced document UNEP/MED WG.457/3 entitled “Draft Updated Classification of benthic marine habitat types for the Mediterranean region”. The representative of the Secretariat reminded the decision IG.23/8 where the Contracting Parties requested the Specially Protected Areas Regional Activity Centre to finalize, in consultation with focal points, the classification of benthic marine habitat types for the Mediterranean region and the Reference List of Marine and Coastal Habitat Types in the Mediterranean, with a view to submitting them to the Contracting Parties at their twenty-first meeting.

19. The representative of the European Topic Centre on Biological Diversity (ETC/BD) made a brief presentation of the EUNIS habitat classification and the revision of its marine section for the levels 1 to 4. He emphasised that the levels 4 to 6 will be developed and aligned with the ones of the regional seas Conventions and in the case of the Mediterranean, the Barcelona Convention lists. He remarked that the final publishing of the updated EUNIS habitat list by EEA is planned by summer 2019.

20. The secretariat gave a brief presentation on the approach used to update the Classification of benthic marine habitat types for the Mediterranean region.

21. The meeting considering the disparity of knowledge between countries in relation to the marine habitats recommended capacity building programme in this regard.

22. Several countries recommended to elaborate an interpretation manual and lexicon for the updated classification list.

23. The meeting agreed on the aggregation approach, proposed amendments to the elements contained in document UNEP/MED WG.457/3 and invited SPA/RAC to submit the revised version (Annex III to this report) to the 14th Meeting of SPA/BD Focal Points and MAP Focal Points meetings and to the 21st Ordinary Meeting of the Contracting Parties, for adoption.

Agenda item 5 **Draft Updated Reference List of Marine Habitat Types for the Mediterranean region**

24. The Secretariat introduced document UNEP/MED WG.457/4 containing the "Draft Updated Reference List of Marine Habitat Types for the Mediterranean region". A brief presentation was given on the criteria used to select the draft updated reference list from draft updated classification of benthic marine habitat types for the Mediterranean region.

25. The meeting agreed that for the specific case of habitats characterised by non-indigenous species, it should not be selected for the reference list whatever is its final rating as the purpose of the reference list is conservation.

26. Discussion took place on the criteria used for the selection of reference list as well as on the level of priority for conservation purposes. The meeting noted that the criteria may be revisited in the future.

27. The meeting highlighted also the fact that some habitats could have different values from one sub-region to another.

28. The meeting highlighted the need to better link the classification and reference lists with the regional Action Plans of species and habitats.

29. The meeting considered the alternative classification of the habitats in 4 categories but, due to some possible knowledge gaps and with the view to facilitating conservation actions, it was agreed to apply the two levels classification.

30. Based on the above considerations, the meeting proposed amendments to the elements contained in document UNEP/MED WG.457/4 and invited SPA/RAC~~PA~~ to submit the revised version (Annex IV to this report) to the 14th Meeting of SPA/BD Focal Points and MAP Focal Points meetings and to the 21st Ordinary Meeting of the Contracting Parties, for adoption.

Agenda item 6 **Any other matters**

31. No other issues were requested to be discussed under this agenda item.

Agenda item 7 **Adoption of the meeting report**

32. The Meeting reviewed the draft report prepared by the Secretariat, modified it and adopted the present report.

Agenda item 8 **Closure of the meeting**

33. After the customary exchange of courtesies, the Meeting was closed on Wednesday 23 January 2018, at 17h55.

There are some geomorphologic / hydrologic features not included in the above list because their presence is independent from the depth zone and the substrate type, but they must also be considered due to the role they play in the Mediterranean ecosystem[1]. They can hold a "complex of habitats" and geoforms that cannot be treated in isolation, and therefore, they do not fit inside other categories. Among them:

- Hydrothermal vents
- Cold seeps (sulfide, methane – e.g. pockmarks, mud volcanoes)
- Brine pools
- Freshwater resurgences
- Seamounts (including banks, hills, etc.)
- Submarine canyons
- Escarpments
- Boulders fields

CIRCALITTORAL

MC1.5 Circalittoral rock

MC1.51 Coralligenous

MC1.51a Algal-dominated coralligenous

MC1.512a Association with Fucales or Laminariales

MC1.51b Invertebrate-dominated coralligenous

MC1.512b Facies with large and erect sponges (e.g. *Spongia lamella*, *Sarcotragus foetidus*, *Axinella* spp.)

MC1.514b Facies with Alcyonacea (e.g. *Eunicella* spp., *Leptogorgia* spp., *Paramuricea* spp., *Corallium rubrum*)

MC1.516b Facies with the Zoantharia *Savalia savaglia*

MC1.517b Facies with Scleractinia (e.g. *Dendrophyllia* spp., *Leptopsammia pruvoti*, *Madracis pharensis*)

MC1.518b Facies with Vermetidae and/or Serpulidae

MC1.519b Facies with Bryozoa (e.g. *Reteporella grimaldii*, *Pentapora fascialis*)

MC1.51c Invertebrate-dominated coralligenous covered by sediment

See MC1.51b for examples of reference facies

MC1.52 Shelf edge rock

MC1.52a Coralligenous outcrops

MC1.523a Facies with Alcyonacea (e.g. *Alcyonium* spp., *Eunicella* spp., *Leptogorgia* spp., *Paramuricea* spp., *Corallium rubrum*)

MC1.524a Facies with Antipatharia (e.g. *Antipathella subpinnata*)

MC1.525a Facies with Scleractinia (e.g. *Dendrophyllia* spp., *Madracis pharensis*)

MC1.526a Facies with Bryozoa (e.g. *Reteporella grimaldii*, *Pentapora fascialis*)

MC1.52b Coralligenous outcrops covered by sediment

MC1.53d Brackish water caves or caves subjected to freshwater runoff

MC1.531d Facies with *Lithistida* spp. sponges

MC2.5 Circalittoral biogenic habitat

MC2.51 Coralligenous platforms

MC2.512 Association with Fucales

MC2.515 Facies with large and erect sponges (e.g. *Spongia lamella*, *Sarcotragus foetidus*, *Axinella* spp.)

MC2.517 Facies with Alcyonacea (e.g. *Alcyonium* spp., *Eunicella* spp., *Leptogorgia* spp., *Paramuricea* spp., *Corallium rubrum*)

MC2.518 Facies with the Zoantharia *Savalia savaglia*

MC2.519 Facies with Scleractinia (e.g. *Dendrophyllia* spp., *Madracis pharensis*, *Phyllangia mouchezii*)

MC2.51A Facies with Vermetidae and/or Serpulidae

MC2.51B Facies with Bryozoa (e.g. *Reteporella grimaldii*, *Pentapora fascialis*)

MC3.5 Circalittoral coarse sediment

MC3.51 Coastal detritic bottoms (without rhodoliths)

MC3.511 Association with Laminariales

MC3.512 Facies with large and erect sponges (e.g. *Spongia lamella*, *Sarcotragus foetidus*, *Axinella* spp.)

MC3.514 Facies with Alcyonacea (e.g. *Alcyonium* spp., *Eunicella* spp., *Leptogorgia* spp.)

MC3.515 Facies with Pennatulacea (e.g. *Pennatula* spp., *Virgularia mirabilis*)

MC3.518 Facies with Bryozoa (e.g. *Turbicellepora incrassata*, *Frondipora verrucosa*, *Pentapora fascialis*)

MC3.519 Facies with Crinoidea (e.g. *Leptometra* spp.)

MC3.52 Coastal detritic bottoms with rhodoliths

MC3.521 Association with maërl (e.g. *Lithothamnion* spp., *Neogoniolithon* spp., *Lithophyllum* spp., *Spongites fruticulosa*)

MC3.522 Association with *Peyssonnelia* spp.

MC3.523 Association with Laminariales

MC3.524 Facies with large and erect sponges (e.g. *Spongia lamella*, *Sarcotragus foetidus*, *Axinella* spp.)

MC3.526 Facies with Alcyonacea (e.g. *Alcyonium* spp., *Paralcyonium spinulosum*)

MC3.527 Facies with Pennatulacea (e.g. *Veretillum cynomorium*)

MC4.5 Circalittoral mixed sediment

MC4.51 Muddy detritic bottoms

MC4.512 Facies with Alcyonacea (e.g. *Alcyonium* spp., *Spinimuricea* spp.)

MC4.513 Facies with Pennatulacea (e.g. *Veretillum cynomorium*)

MC6.5 Circalittoral mud sediment

MC6.51 Coastal terrigenous muds

MC6.511 Facies with Alcyonacea (e.g. *Alcyonium* spp.) and Holothuroidea (e.g. *Parastichopus* spp.)

MC6.512 Facies with Pennatulacea (e.g. *Pennatula* spp., *Virgularia mirabilis*)

There are some geomorphologic / hydrologic features not included in the above list because their presence is independent from the depth zone and the substrate type, but they must also be considered due to the role they play in the Mediterranean ecosystem[2]. They can hold a "complex of habitats" and geoforms that cannot be treated isolated, and therefore, they do not fit inside other categories. Among them:

- Hydrothermal vents
- Cold seeps (sulfide, methane – e.g. pockmarks, mud volcanoes)
- Brine pools
- Freshwater resurgences
- Seamounts (including banks, hills, etc.)
- Submarine canyons
- Escarpments
- Boulders fields
