

Call for consultancy N°06_2020 SPA/RAC

Terms of reference for regional consultant on marine habitats
under the IMPA-MPA project

Technical specifications

1- Background

The Regional Activity Centre for Specially Protected Areas (SPA/RAC) was created in 1985 and established in Tunis through a decision of the Contracting Parties to the Convention for the Protection of the Marine and Coastal Environment of the Mediterranean (Barcelona Convention). It functions within the framework of the Action Plan for the Mediterranean – Barcelona Convention (UN Environment/MAP).

SPA/RAC's main aim is to contribute towards the protection, conservation and sustainable management of Mediterranean coastal and marine areas of special cultural and natural value and of threatened and endangered species.

In line with Decision IG.24/17 on the UNEP/MAP 2020-2021 Programme of Work and Budget (Naples, Italy, 2-5 December 2019); Decision IG.22/7 on the Integrated Monitoring and Assessment Programme of the Mediterranean Sea and Coast and Related Assessment Criteria (IMAP) (Athens, Greece, 9-12 February 2016); Decision IG.23/06 on the 2017 Mediterranean Quality Status Report (Tirana, Albania, 17-20 December 2017); Decision IG.24/7 on the Roadmap and Needs Assessment for the 2023 Mediterranean Quality Status Report (Naples, Italy, 2-5 December 2019); the Contracting Parties to the Barcelona Convention have updated/developed their national monitoring programmes based on the IMAP Common Indicators per each cluster namely Biodiversity and Non-indigenous species (NIS), Pollution and Marine Litter, and Coast and Hydrography. The 23 Common Indicators of IMAP cover mainly state and impact indicators.

The project "Towards achieving the Good Environmental Status of the Mediterranean Sea and Coast through an Ecologically Representative and Efficiently Managed and Monitored Network of Marine Protected Areas" (hereinafter IMAP-MPA project) aims to ensure that additional support is provided for the national implementation of IMAP, and for the delivery of reliable data for IMAP common indicators on three clusters: (i) biodiversity and NIS, (ii) pollution and marine litter (iii) and coast and hydrography by the seven eligible Contracting Parties (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia).

The IMAP-MPA project will also enable the development and implementation of integrated monitoring programmes at the sub-regional level which address the same above-mentioned IMAP clusters, and particularly in areas which are known to be under human activity pressure. As such, the project will enhance the level of capacity in each country to facilitate the national implementation of the IMAP and to facilitate the reporting of reliable data by each country for the IMAP common indicators.

As such, the project will enhance the level of capacity in each country to facilitate the implementation of the system and to facilitate the reporting of reliable data by each country for the selected IMAP common indicators. An important aspect of this project is related to a better definition of assessment scales and monitoring as well as assessment criteria per each IMAP cluster and across the clusters with a particular focus on biodiversity and hydrography.

In this regard, there is a need for recruiting regional consultant(s) to support the SPA/RAC by providing scientific and technical guidance to the national teams and consultants for biodiversity (i.e. marine habitats, species and non-indigenous species) monitoring related activities under IMAP MPA project.

2. Objective and scope of the assignment

The aim of this consultancy is to provide technical guidance and support to the national IMAP teams responsible for biodiversity monitoring as well as national consultants to monitor and assess marine environment with regards to EO1 IMAP related Common Indicators (CIs) 1 and 2 on habitats in selected areas taking into account the need for interlinkages with other ecological objectives, work undertaken on assessment criteria and integrated/joint monitoring, monitoring, assessment and reporting scales as well as interlinkages between impact, pressures and activities.

The ultimate result of this assignment is to ensure that national country teams of the southern Mediterranean countries are given the necessary technical support and guidance to effectively deliver project activities related to biodiversity EO1/habitats integrated monitoring and assessment, and related assessment scales aspects.

3. Tasks to be undertaken

Under the direct coordination and guidance from SPA/RAC IMAP-MPA Project Officer and Ecosystem conservation programme officer, the consultant will be responsible for the following tasks:

1. Prepare a detailed work plan and timetable;
2. Elaborate a specific and thorough analysis per country (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia), focusing on reviewing the EO1/Biodiversity (habitats) chapter of the national IMAPs (i.e. proposed monitoring sites, techniques and methodologies) and its integration potential with EO1 (species), EO5, EO9 and EO10 (IMAP Pollution and marine litter Cluster), as well as with EO7-EO8 (IMAP Coast and Hydrography Cluster);
3. Provide technical guidance to national country teams and design concrete integrated monitoring plans by country (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia) for IMAP EO1 Biodiversity/Habitats, defining the marine habitats to be monitored based on the recently updated list of marine Habitat type¹, specifying monitoring sites/transects, their respective Common Indicators, methodologies and protocols for their measurements, quality assurance and reporting schemes, costs of implementation and other elements necessary to build, support and implement a reliable process for project activities implementation;
4. Support national teams to identify the gaps and define a concrete roadmap to address the specific needs for the implementation of IMAP EO1/Habitats monitoring programme;
5. Design practical training modules (incl. on monitoring areas/sites definition, application of monitoring protocols, quality assurance and quality control, reporting of data) for IMAP EO1/Habitats considering existing knowledge and practice for IMAP implementation;
6. Provide technical support to national/sub-regional training workshops with national teams related to IMAP EO1/Habitats;
7. Provide technical support to the design and implementation of field monitoring surveys focusing primarily on IMAP EO1/Habitats;
8. Participate in round-table discussions at national level aimed at streamlining of the roles and responsibilities for IMAP implementation as defined in national IMAP monitoring programmes for all three IMAP Clusters (i.e. Biodiversity; Coast and Hydrography and Pollution and Marine Litter);
9. Contribute to the work of CORMON Biodiversity and related Online Working Groups;

¹ SPA/RAC–UN Environment/MAP, 2019: Updated Classification of Benthic Marine Habitat Types for the Mediterranean Region

10. Provide inputs to the preparation of the tender documentation for purchasing/renting of equipment (e.g. vessels for filed surveys, laboratory equipment) to address the needs for IMAP implementation as part of the package of the field monitoring survey;
11. Guide and support the national teams in monitoring data reporting into the IMAP Pilot Info system;
12. Review the existing scales of monitoring and assessment criteria for IMAP EO1/Habitats;
13. Propose adequate scales of monitoring and assessment criteria for IMAP EO1/Habitats;
14. Develop the baseline and thresholds values for the two common indicators for the identified habitats;
15. Work together with the other regional consultants towards consolidating and harmonizing the relevant input;

4. Deliverables and expected outcomes

Deliverables*		Related Tasks
<p>Deliverable 1: Work plan and timetable</p> <p>Production of 1 document detailing the work plan and timetable</p>	Document detailing the work plan and timetable	Task 1
<p>Deliverable 2: National integrated monitoring plan of marine habitats</p> <p>Production of 7 documents (word) including 3 documents in French for Algeria, Morocco and Tunisia; and 4 documents in English for Egypt, Israel, Lebanon and Libya</p>	Concrete monitoring plan for EO1/habitats and relevant proposal for integration, for IMAP EO1/Habitats (in collaboration with national consultants and national partners), complementary the relevant chapters of national IMAPs, are prepared for all countries (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia) providing with recommendations and proposals on the integration potential of IMAP EO1/Habitats with the other IMAP Ecological Objectives (i.e. EO2, EO5, EO7, EO8, EO9 and EO10), as well as gaps and lessons learnt	Tasks 2 and 3
<p>Deliverable 3: National field survey programme of marine habitats</p> <p>Production of 7 documents (word) including: 3 documents in French for Algeria, Morocco, and Tunisia; and 4 documents in English for Egypt, Israel, Lebanon, and Libya</p>	A field survey programme for IMAP EO1/Habitats is prepared for countries (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia) in an integrated manner as appropriate with the other Common Indicator per each selected monitoring site, as well as related input for the Tender documentation package	Tasks 4 and 10
<p>Deliverable 4: Training modules, meeting reports</p>	Technical input/training material, along with transfer of hands-on experience, are provided to support the organization of capacity building workshops, training sessions and	Tasks 5, 6, 7 and 8

<p>-Production of 1 Document (word) including training materials English and French</p> <p>-Production of 7 national training reports including: 3 reports in French for Algeria, Morocco, and Tunisia; and 4 reports in English for Egypt, Israel, Lebanon, and Libya and presentations (PowerPoint)</p>	<p>roundtable discussions, as well as field surveys including in national and sub-regional meetings/workshops</p>	
<p>Deliverable 5: Technical support</p> <p>Production of Meeting minutes (Word) and presentations (PowerPoint) in English or French</p>	<p>Technical inputs provided to SPA/RAC, CORMON and Online Working Groups on IMAP EO1/ Habitats, upon request</p>	<p>Task 9</p>

Total	121																								

The consultancy firm /consultant may be expected to undertake missions to SPA/RAC premises, countries, or regional and technical meetings for the needs of the current assignment. Decision on this matter will be taken by SPA/RAC.

Virtual meetings with the project's beneficiary countries and partners/national stakeholders will be conducted by teleconference/skype/phone.

6. Skills and experience required of consultant(s)

In both cases, consulting firms or individual consultants, no more than two (02) experts could be proposed for the implementation of the tasks of the present assignment. In all cases, the lead expert will be the official representative vis-à-vis SPA/RAC.

The expert(s) should meet the following criteria:

- Advanced experience in marine habitats studies and conservation is required;
- A minimum of 10 years of relevant experience in (i) monitoring and assessment of the marine environment and (ii) indicators-based assessment of the impacts and pressures on the status of Mediterranean marine environment, is required;
- Good knowledge of the implementation of the Barcelona Convention Ecosystem Approach (EcAp) process /Integrated Monitoring and Assessment Programme (IMAP) is required;
- Good knowledge of the implementation of the EU Marine Strategy Framework Directive – MSFD (2008/56/EC), or having experience in its implementation, is an asset;
- Fluency in English and French is required*.

*Online and on-site (country visits) exchanges that should be coordinated by the consultant(s) will be run in English and French. The consultant(s) must therefore be fluent in both languages, written and spoken.

Administrative clauses

Article 1- Conditions of participation in the tender

The service provider must have proven competence in marine habitats studies and conservation.

Offers may be made by specialized consulting firms, or by individual consultants.

Individual consultants may associate with each other to form a consultant association to complement their respective areas of expertise, or for other reasons. They must clearly identify the lead consultant, who will be the legal representative of the consultant association. The consultant association cannot exceed two experts.

Consulting firms must propose a lead expert on marine habitats who can be supported by one other expert to complement their respective areas of expertise or for other reasons that need to be specified in the offer.

Offers from joint venture or consortiums are authorized (provided that they are forming a joint-liability consortium and that the leading member of the consortium is clearly identified in the consortium deed, an original copy of which should be included with the offer).

Article 2- Content of offers

The offers' document must include separately a technical offer, administrative documents, and a financial offer.

2.1 Technical offer

It must contain:

For individual consultants:

- a) Personal CV (signed/initialled by the expert on every page of the CV) indicating all experience in the field of marine habitats studies and conservation, as well as the experience and references regarding similar studies and reference proof copies (including copies/certificates of highest university diploma(s)); If a second expert is proposed, the same documents and information should be provided.
- b) A detailed methodological note on how he/she will approach and complete the assignment, including a planning and detailed time schedule (and chronogram of intervention of the team in case of 2 experts involved in the offer).

For consulting firms:

- a) The firm's references regarding similar studies (including reference proof certificates);
- b) The CV of the experts (one or two) with their qualifications, experience/references; indicating all experience in the field of marine biodiversity (marine habitats) and environmental conservation (including reference proof certificates);
- c) A methodological note on how they will approach and complete the assignment and a planning and detailed time schedule (and chronogram of intervention of the team in case of 2 experts involved in the offer).

Applicants are encouraged to send links to references of previous works completed on subjects relevant to the consultancy or share relevant documents by e-mail if those are not accessible online.

The selection process may include interviews (through Skype, videoconference, or phone), as well as a pre-selection phase followed by requests for complementary information/negotiation if required.

2-2 Administrative documents:

For individual consultants:

1. Document certifying the ability to practice this profession (registration certificate, for example) according to the legislation of their country with the tax number on it.
2. A sworn statement that the bidder is in no situation that could in any way be incompatible with the mission or compromise independence in carrying out the mission.
3. The consultant must prove the legal capacity to sign contracts and issue invoices according to the respective country legislation of fiscal residence.
4. ToRs signed (date, signature and stamp at the end of the document).

For consultancy firms:

1. A tax certificate, valid on the offer submission date, proving that the firm has no outstanding tax obligations.
2. A certificate proving that the tenderer is registered in the commercial register.
3. A statement delivered by the social security body to which the provider is affiliated stating that all dues have been paid and which is valid on the date of submission.
4. A sworn statement of non-bankruptcy.
5. A sworn statement that the firm is in no situation that could in any way be incompatible with the mission or compromise independence in carrying out the mission.
6. A sworn statement from each of the members of the work team, who are not staff members, confirming that they are willing to participate in the work team to carry out this mission.
7. TORs signed (date, signature and stamp of the provider firm at the end of the document).

2-3 – Financial offer

The financial offer must be expressed in both tax-free and all taxes included prices. It should include all the costs connected to the provision of the service. The financial offer should also include the following documents:

For both, individual consultants and consultancy firms:

1. Submission letter, using the template attached in Annex 1;
2. Estimated details of total tender price using the template attached in Annex 2.

Should any administrative documents be missing, the consultant/firm will be contacted to complete the offer documents. If after a period of 10 days, the documents are still not complete the candidate offer may be rejected even if already chosen as best positioned.

SPA/RAC will make no payment and no reimbursement of expenses related to the preparation of proposals.

Article 3 - Submission

Proposals must be received electronically at the following e-mail address:

car-asp@spa-rac.org, before 26 June 2020 at 17h00 UTC+1

E-mails should have the following subject: **“Call for consultancy n°06_2020 SPA/RAC_EcAp/IMAP Biodiversity related to Habitats- Name of the consultant or the consultancy firm”**.

Proposals received after this deadline will not be considered.

Article 4- Additional information:

Should any problems of interpretation arise in the course of drawing up the proposal, bidders may submit a written request by email for further information to : mehdi.aissi@spa-rac.org in Cc: asma.yahyaoui@spa-rac.org and car-asp@spa-rac.org. Request for additional information, if needed, should be done no later than 05 calendar days before the deadline for the proposal submission.

Article 5 - Definition, consistency, and variation of prices

The services provided as part of this assignment consist of an overall fixed and non-revisable cost.

Article 6 - Terms of payment

Payment for the mission will be made as follows:

- 1) 10% upon submission of the deliverables 1, 8 & 9 and after the review and approval of SPA/RAC and receipt of the invoice;
- 2) 20% upon submission of the deliverables 2, 3 & 6 and after the review and approval of SPA/RAC and receipt of the invoice;
- 3) 20% upon submission of deliverables 4 and after the review and approval of SPA/RAC and receipt of the invoice;
- 4) 20% upon submission of deliverables 5 & 7 after the review and approval of the SPA/RAC and receipt of the invoice;
- 5) 20% upon submission of the final version of all deliverables, taking into consideration comments raised during technical meetings, and after the review and approval of SPA/RAC and the delivery of the provisional acceptance without reservation and the receipt of the invoice.
- 6) 10 % after the delivery of the final acceptance as described in article 17 and the receipt of the invoice.

All payment will be made in US Dollar by bank transfer within 45 days after the receipt of an invoice by the contractor.

Article 7 - Offers evaluation procedure

The selection of the consultant/firm will be done based on the presentation of a detailed letter of interest making clear reference to fulfilment degree of the above Terms of Reference, CVs referring to relevant work, and a methodological note including a detailed time schedule.

7-1 Evaluation of technical offers

The technical offers will be first examined, while the financial offers remain sealed. The following criteria will be evaluated:

- 1- Consulting firm's general experience and technical references (20 points) (if a consulting firm is involved in the tender);
- 2- Experts / Individual consultant(s) capacity and expertise (45 points) (or 65 points if individual consultants are involved in the tender);
- 3- Methodology, organization and schedule (35 points).

Criteria		Scoring if a consulting firm is involved	Scoring for individual consultant(s)	
1- Firm's general experience and technical references. Working experience in the Mediterranean is an asset. (references presented by the competing firms will be assessed according to their nature, number and date of delivery)	a- Nature and number of similar jobs, references delivered by study sponsors must be provided as proof <i>is considered as similar studies all regional, sub-regional and national monitoring and assessment studies of the marine habitats and indicators-based assessment of the impacts and pressures on the status of marine environment (including interlinkages with other ecological components, development of assessment criteria monitoring, assessment and reporting scales as well as interlinkages between impact, pressures and activities).</i>	Nature and number of similar justified studies.	15 points maximum (4 points/reference, 1 additional point/reference in the Mediterranean;	
		No similar studies	0 points (in this case the offer is eliminated)	
	b- Date when the most recent studies were carried out	Less or equal to 5 years	5 points maximum (1 point/study)	N/A
		Between 5 and 10 years	3 points (0,5 point/study)	N/A
		Over 10 years	0 points	N/A

Criteria		Scoring if a consulting firm is involved		Scoring for individual consultant(s)		
		One Senior expert is involved	One Senior expert is involved	One senior expert is involved	Senior expert supported by additional expert	
2- Evaluation of the proposed project team and its experience (in the Mediterranean is an asset) (assessment will be based on the number of similar studies the proposed specialists have contributed to and the nature of their qualifications).	a- <u>Project leader: (Senior expert)</u> Experience and knowledge of marine habitats monitoring and assessment studies and conservation <i>is considered as similar studies all regional, sub-regional and national monitoring and assessment studies of the marine habitats and indicators-based assessment of the impacts and pressures on the status of marine environment (including interlinkages with other ecological components, development of assessment criteria monitoring, assessment and reporting scales as well as interlinkages between impact, pressures and activities).</i>	Experience in similar studies	<u>40 points maximum</u> <i>(10 points/ as project leader in similar study, 2 additional point/similar study as project leader in the Mediterranean)</i> <i>Or 8 points/ similar study just as expert, 2 additional point/similar study as project leader in the Mediterranean</i>	<u>25 points maximum</u> <i>(6 points/ as project leader in similar study, 2 additional point/similar study as project leader in the Mediterranean)</i> <i>Or 5 point/ similar study just as expert, 2 additional point/similar study as project leader in the Mediterranean</i>	<u>60 points Maximum</u> (12 points / study + 3 point / study including the Mediterranean area and /or countries)	<u>45 points Maximum</u> (10 points / study + 2 point/study including the Mediterranean area and /or countries)
		No similar study	0 points (in this case the offer is eliminated)	0 points (in this case the offer is eliminated)	0 points (in this case the offer is eliminated)	0 points (in this case the offer is eliminated)
		Post-graduate university degree in marine habitats' conservation, marine biology, marine science or equivalent field	<u>5 points maximum</u>	<u>5 points maximum</u>	<u>5 points maximum</u>	<u>5 points maximum</u>

		University degree in the above-mentioned fields	3 points	3 points	3 points	3 points
		No university degree in the above-mentioned fields	0 point (in this case the offer is eliminated)	0 point (in this case the offer is eliminated)	0 point (in this case the offer is eliminated)	0 point (in this case the offer is eliminated)
b- Expert Experience and knowledge of Marine habitats' studies and conservation		Experience in similar studies	N/A	10 points maximum (5 points/ as expert in similar study, 1 additional point/similar study as expert in the Mediterranean)	N/A	10 points maximum (5 points/ as expert in similar study, 1 additional point/similar study as expert in the Mediterranean)
		No similar study	N/A	0 point	N/A	0 point
		Post-graduate university degree in marine habitats (marine vegetations) conservation, marine biology, marine science or equivalent field	N/A	5 points maximum	N/A	5 points maximum
		University degree in the above- mentioned fields	N/A	3 points	N/A	3 points
		No university degree in the above-mentioned fields	N/A	0 point (in this case the offer is eliminated)	N/A	0 point (in this case the offer is eliminated)
	In case the bidder proposes more than one expert per position, each CV will be evaluated separately, and the lowest score given will be the one attributed to that position.					
3- Methodology, time planning schedule,	a- The methodological note evaluation	Methodology clearly presented, well developed, and meets	15 points maximum		15 points maximum	

chronogram of intervention		the terms of reference and the study's objectives		
		Methodology more or less well developed but clearly meets the terms of reference and the study's objectives	10 points	10 points
		Methodology poorly developed and meets partially the terms of reference and the study's objectives	5 points	5 points
		Methodology not clearly presented and does not meet the terms of reference and the study's objectives or no methodology presented	0 points	0 points
	b- Planning, time schedule and chronogram of intervention	Realistic planning clearly presented, coherent with the time schedule considering the requested time for reports validation and coherent with the chronogram of intervention	<u>20 points maximum</u>	<u>20 points maximum</u>
		Realistic planning but more or less well presented, fairly coherent with the time schedule and with the chronogram of intervention	10 points	10 points
		Planning unclearly presented, doesn't respect the deadline, or	0 point	0 point

		no planning, or no time schedule (and doesn't respect the chronogram of intervention of each expert in case of 2 experts involved in the offer)		
--	--	---	--	--

Any offer that has not attained the minimum score of 80 points will be eliminated. In the event of no offer obtains 80 points or more, the tender process will be declared unsuccessful.

7.2 Financial evaluation:

Once the technical evaluation has been completed, the financial offers of tenders that have not been eliminated during the technical evaluation will be examined.

The evaluation committee will check that the financial offers do not contain any obvious arithmetical errors. Any possible obvious arithmetical errors will be corrected, and the corrected figures will be taken into consideration.

A maximum budget of twenty-seven thousand US Dollar (USD 27,000), is available for this study.

Any financial offer exceeding this budget means that the offer will be eliminated.

The evaluation committee will then proceed to a financial comparison. The lowest financial offer will receive 100 points. The other offers will be attributed a score based on the following equation:

Financial score = (amount of the lowest offer/amount of the offer in question) x 100

7.3 Conclusions of the evaluation committee

The choice of the best offer is achieved by weighting the technical and financial scores using a distribution key of 80/20 basis. To this end:

- The technical score will be multiplied by a coefficient of 0,80.
- The financial score will be multiplied by a coefficient of 0,20.

The weighted technical - financial scores thus calculated will be added to ascertain the offer with the best technical and financial score.

If two offers obtain the same weighted technical-financial scores, preference will be given to the tenderer in the following order:

- having obtained the best technical score
- having obtained the best total score for experience and qualifications of experts.
- having obtained the best score for methodology.

Article 8- Deadline for the execution of the mission

The maximum time allocated for carrying out the study is five (5) months (one hundred and twenty-one (121) working days), spread over twenty-four (24) months, as from the date of signature of the contract, including the deadlines for handing in the final documents and deliverables according to the following timeline:

Deliverables		Deadline	
		Draft	Final
Deliverable 1: Work plan and timetable Production of 1 document detailing the work plan and timetable	Document detailing the work plan and timetable	<i>One week after the contract signature</i>	
Deliverable 8: Scales of monitoring, scales of	Document is prepared:	<i>7 September 2020</i>	<i>15 October</i>

assessment and assessment criteria Production of 1 document (Word) in English on scale of monitoring, scale of assessment and assessment criteria	- to reflect the scale of monitoring of the common indicators 1 and 2 (marine habitats) (all Mediterranean countries), - to elaborate elements for scale of assessment and assessment criteria, including relevant recommendations		2021
Deliverable 9: Baseline and thresholds Production of 1 document (Word) in English on baseline and thresholds	Document is prepared reflecting the baseline and thresholds of the EO1/Habitats.	7 September 2020	15 October 2021
Deliverable 2: National integrated monitoring plan of marine habitats Production of 7 documents (word) including 3 documents in French for Algeria, Morocco and Tunisia; and 4 documents in English for Egypt, Israel, Lebanon and Libya	Concrete monitoring plan for EO1/habitats and relevant proposal for integration, for IMAP EO1/Habitats (in collaboration with national consultants and national partners), complementary the relevant chapters of national IMAPs, are prepared for all countries (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia) providing with recommendations and proposals on the integration potential of IMAP EO1/Habitats with the other IMAP Ecological Objectives (i.e. EO2, EO5, EO7, EO8, EO9 and EO10), as well as gaps and lessons learnt	30 October 2020	5 March 2021
Deliverable 3: National field survey programme of marine habitats Production of 7 documents (word) including: 3 documents in French for Algeria, Morocco, and Tunisia; and 4 documents in English for Egypt, Israel, Lebanon, and Libya	A field survey programme for IMAP EO1/Habitats is prepared for countries (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco and Tunisia) in an integrated manner as appropriate with the other Common Indicator per each selected monitoring site, as well as related input for the Tender documentation package	16 November 2020	8 March 2021
Deliverable 6: Tender document Production of 7 tender documents (Word) including: 3 tender documents in French for Algeria, Morocco, and Tunisia; and 4 tender documents in English for	Tender document for purchasing/renting of equipment of relevance for IMAP EO1/Habitats is prepared	21 December 2020	12 February 2021

Egypt, Israel, Lebanon, and Libya			
<p>Deliverable 4: Training modules, meeting/ workshops reports</p> <p>Production of 1 document (word) including training materials English and French</p> <p>Production of 7 national training reports including: 3 reports in French for Algeria, Morocco, and Tunisia; and 4 reports in English for Egypt, Israel, Lebanon, and Libya and presentations (PowerPoint)</p>	Technical input/training material, along with transfer of hands-on experience, are provided to support the organization of capacity building workshops, training sessions and roundtable discussions, as well as field surveys including in national and sub-regional meetings/workshops	5 April 2021 (Training materials)	7 May 2021 (Training materials)
<p>Deliverable 5: Technical support</p> <p>Production of Meeting minutes (Word) and presentations (PowerPoint) in English or French</p>	Technical inputs provided to SPA/RAC, CORMON and Online Working Groups on IMAP EO1/ Habitats, upon request	<i>Will be specified once the CorMon and online working groups timelines are fixed</i>	
<p>Deliverable 7: Data submission</p> <p>Deliver support to 7 countries to prepare and submit their data to IMAP Info System</p>	Support to countries (i.e. Algeria, Egypt, Israel, Lebanon, Libya, Morocco, and Tunisia) to upload data sets coming from the filed survey implementation to IMAP Info System is provided including quality assurance	October 2021	

The evaluation of each draft deliverable will be carried out by SPA/RAC within a maximum of 21 days from the submission of the deliverable by the tenderer.

Article 9- Monitoring, control and validation of the work

The service tenderer will work under the direct supervision of the SPA/RAC IMAP-MPA Project Officer and the SPA/RAC Ecosystem conservation programme officer and under the overall supervision of the SPA/RAC director. The direct implementation is done in close cooperation with the UNEP/MAP IMAP-MPA Project Manager, and under the overall supervision of UNEP/MAP Deputy Coordinator. The service provider will submit the draft and final version of the deliverables as indicated in article 8.

Article 10- Penalty

In the absence of completion by the tenderer of the services at his charge within the contractual deadlines envisaged in article 8 “*Deadline for the execution of the mission*”, it will be applied as of right and without notice, a penalty of one two hundredth (1/200) of the total amount of the

contract (All Taxes Included - ATI) for each calendar day of delay individually on each deliverable. The amount of the late penalties will be deducted from the accounts. The amount of the penalties is capped at 10% of the total amount of the contract in (ATI). When this ceiling is reached, SPA/RAC reserves the right to terminate the contract at the holder's fault, in accordance with article 15 "cancellation" below, without that the holder cannot raise disputes or claim any compensation.

Article 11-Copyright, ownership of documents

All the plans, drawings, specifications, studies, reports, other documents and softwares, submitted by the tenderer to UNEP/MAP-SPA/RAC for the execution of the present contract, will become and remain the property of UNEP/MAP-SPA/RAC, and the service tenderer will submit them to UNEP/MAP-SPA/RAC. The names and logos of UNEP/MAP-SPA/RAC must be displayed appropriately.

Article 12-Arbitrage, dispute settlement

Every dispute arising from or in connection with this contract execution shall be solved by way of amicable negotiations by the parties. This agreement is deemed to have been made in Tunisia and to be subject to Tunisian law. In case of dispute, the Court of Tunis is competent.

Article 13-Liability and insurance

The SPA/RAC does not accept any liability for acts of third parties, accidents, sickness, losses of any kind, however caused arising during the implementation of the specific actions and the production of the relative outputs expected. The tenderer confirms that themselves or any staff involved in the implementation of this contract will be covered by appropriate insurance.

Article 14- Force majeure

Force majeure means any event outside the control of a Party so that it is impossible for one party to carry out his obligations or the implementation of these obligations become so difficult that it is considered to be impossible to carry them out under such circumstances.

The party which invokes force majeure must inform his co-contractor within seven (07) days of its occurrence so that the contractual deadline will be suspended with a joint agreement between the parties for the period which is covered by the case of force majeure.

SPA/RAC has a right to assess the circumstances of the impediments invoked by the holder as a case of force majeure to see if they are convincing and should this not be the case, then the days of discontinued work will be accounted for as days of delay.

Failure by either Party to fulfil any of his contractual obligations does not entail a contract termination or failure to fulfil his contractual obligations if such a failure is due to a case of force majeure, if the Party that finds himself in such a situation has done the following:

- a. has taken all the reasonable precautions and measures to allow him to comply with the terms and conditions of the present contract; and
- b. has informed the other Party of the event as soon as possible. Any timeline given to a Party for the execution of his contractual obligation will be prolonged by a period which is equal to the period during which that Party was prevented from fulfilling his obligations.

Any timeline given to a Party for the execution of his contractual obligations will be prolonged by a period which is equal to the period during which that Party was unable to fulfil his obligations due to the case of force majeure.

Article 15- Cancellation conditions

SPA/RAC could cancel this contract through a notification in writing addressed to the tenderer after one of the events indicated in the following paragraphs:

- a) no respect of the deadline of the execution in application of Article 8-*Duration, deadlines and schedule for the implementation individually* for all deliverables;
- b) in the case described in the article 10- *Penalty* when the amount is capped at 10% of the total amount of the contract;
- c) non-conformity to the content of the service listed in the technical specification of the present tender documents;
- d) If the tenderer goes bankrupt or into receivership;
- e) If, after a case of force majeure, the holder is unable to execute a substantial part of the Services for a period equal to at least sixty (60) days;
- f) If the tenderer was involved in corruption or fraudulent manipulations in order to obtain the Contract or during the execution of the Contract. For the purpose of the clause: a person is guilty of « corruption » if he offers, gives, solicits or accepts any kind of advantage in order to influence the action of a public official during the selection or the execution of the Contract, and undertakes «fraudulent manipulations» which distort or denature the facts so as to influence the selection or the execution of the contract to the detriment of the Borrower; by «fraudulent manipulations », is meant any agreement or collusive manipulation of the bidders (before or after submitting the proposals) so as to artificially maintain the prices of the tenders at levels which do not correspond to prices which would have resulted from free and open competition and which deprive the Borrower of the advantages of free and open competition;
- g) If SPA/RAC, on his own initiative and for any reason whatsoever, decides to terminate the contract.

Article 16- Conflict of interests

16.1 Prohibition of incompatible activities

The contract tenderer, the personnel and agents must not engage, directly or indirectly, during the contract implementation period, in professional or commercial activities which could be incompatible with the activities with which they have been entrusted due to the present contract.

16.2 Non-participation of the holder and his associates in certain activities

The tenderer and his associates are prohibited, during the contract duration and at the end of the contract period, to provide good, works or services means for any project stemming from the Services or closely connected with the Services (except for the implementation of the Services and their continuation).

Article 17- Provisional and final Acceptance

The provisional acceptance is pronounced after complete completion of the services, that is, after the finalization of all the phases described in the article 8 and Section 4 of the “Technical Specifications”. The evaluation of the deliverables will be carried out by SPA/RAC according to the article 9 "Monitoring, control and validation of the work”.

The provisional acceptance will be pronounced only in the case of complete conformity deemed conclusive by SPA/RAC and a provisional acceptance report will be signed jointly by the service provider and SPA/RAC. The service provider must correct any deficiencies identified by SPA/RAC in the completion of the different phases.

Final acceptance will be given two (2) months after the date of provisional acceptance without reservation of the contract. The final acceptance report will only be delivered once the service provider has fulfilled all his obligations resulting from the Section 4 of the “Technical Specifications” and after correction of any deficiencies signaled by SPA/RAC.
